Highlands Links is ranked 69th in the world and top public golf course in Canada by Golf Magazine (Sept., 2001). It is a true links course, framed by the rugged Atlantic coastline and the mountainous contours of the Cape Breton Highlands. George Knudson, Canada's smooth-swinging and most successful PGA professional, called Highlands the "Cypress Point of Canada". He'd stroll the fairways without his clubs just to savour the scenery.

Highlands Links is truly an authentic gem, designed and built in 1939 as Stanley Thompson's acclaimed masterpiece in Cape Breton Highland's National Park. Thompson called the Links his "Na Beanntan agus aMhuir", or "mountains and ocean" golf course. Like many courses in Scotland, the Highlands Links was designed simply to be played, experienced and enjoyed.

HIGHLANDS LINKS

Ingenious routing from rocky headlands to lovely wooded glens, stupendous vistas, deep gullies and swales combine to deliver an exhilarating challenge. The course captures more of the Scottish tradition with its colourful Celtic names for the holes. Golf magazine described the course as one true to Thompson's belief in "strategic, natural holes with creativity around the greens" with "topsy turvy fairways that can result in uneven lies and odd bounces, but without being overly punishing; greens that are small and well guarded; and a superb collection of par fives, from the tight and mounded 570 yards seventh (Killiecrankie), to the uphill 460 yard 16th (Sair Fecht) highlighting a balanced and enjoyable layout."

Highlands Links is indeed one of Canada's premier courses, ranked number one in Canada (Score Golf, July 2000), a national treasure and a golf experience you will not soon forget. Preview our course on the following pages, and call 1-800-441-1118 for tee times.
